Continuation of 2. NOTE: The limitation of the chemical structures being aligned with their predetermined fixed position has not be en previously considered.

Continuation of 5. does NOT place the application in condition for allowance because: Applicants' arguments seem to be directed to the instant device functioning by noting the detection of an analyte by the position of the chemical structures. Since the patentability of devices is determined by the structure of the device and not how the device functions, the arguments are not persuasive.
